Portfolio: <https://sanketdesai.vercel.app>

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on experience building AI/ML systems, backend services, and Android applications across internships in AI platform engineering, web development, and cybersecurity. Proficient in Python, FastAPI, React, SQL, Docker, Machine Learning, LLMs, LangChain, and REST API design. Seeking Software Engineer, AI/ML Engineer, or Python Backend Developer roles.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Deccan Education Society, Pune University

2023 – 2026

CGPA: 7.0

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, Kotlin

Backend: FastAPI, REST APIs, Node.js

AI/ML: PyTorch, TensorFlow, Scikit-learn, LangChain, LangGraph, Ollama, LLMs

Frontend: React, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

Tools: Docker, Git, Linux, Android Studio

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Web Development Intern — Developers Arena

Aug 2025 – Jan 2026

- Developed frontend and backend modules using HTML, CSS, JavaScript, Node.js, and SQL.
- Built REST APIs, resolved multiple production bugs, and collaborated on full-stack feature development.
- Improved application reliability through systematic testing and debugging.

Cybersecurity Intern — White Band Associates

June 2026 – July 2026

- Performed ethical hacking assignments covering reconnaissance and network scanning, delivering GitHub-ready documentation for each assessment.

PROJECTS

Agentic Security Operations Center

Python, FastAPI, PyTorch, LangGraph, Docker

- Developed an AI-powered SOC for real-time network monitoring and anomaly detection using GNN/DNN/LSTM models across an 11-container Docker deployment.
- Implemented ML-based threat detection, risk scoring, and automated response workflows.
- Built scalable backend APIs and monitoring dashboards.

GymTracker (Forge) – Android Fitness App

Kotlin, Jetpack Compose, Room Database

- Built a modern Android fitness application with full navigation and a complete workout-logging MVP.
- Implemented offline persistence using Room Database and reusable Jetpack Compose UI components.
- Designed a clean, scalable architecture to support future AI-powered features.

LLM-Powered Text-to-SQL Engine

Python, FastAPI, SQL, Ollama

- Built a schema-agnostic tool converting natural language questions into executable SQL queries using a local LLM.
- Developed query validation and execution workflows for relational databases.

Autonomous Document-Writing Agent

Python, FastAPI, Groq (Llama 3.3 70B)

- Built an autonomous FastAPI agent that plans, writes, and revises documents using Groq's Llama 3.3 70B in an iterative, self-reviewing workflow.

CERTIFICATIONS & ACHIEVEMENTS

- JPMorgan Chase Software Engineering Virtual Experience Program
- JPMorgan Chase Quantitative Research Virtual Experience Program
- Electronic Arts Software Engineering Virtual Experience Program
- Participated in Cybersecurity Capture The Flag (CTF) competitions; shipped multiple end-to-end AI, backend, Android, and full-stack projects.
